

OptiMax Modular Unit -Tailor made for you

IteraSpace modular solutions are custom engineered for modular solution providers and their end customers. **OptiMax** units are based on the steel moment frame structure with a complete set of quick connection system, which enables coupling units together horizontally and vertically in no-time. We will take into account the specifics you require and provide you with personalized spaces with customizable interior and exterior.

The Concept and Execution

Our modular solutions are based on the range of modules with sustainability, great design, safety, energy efficiency and total comfort, build into their DNA. We will take care of strategic material sourcing, production and quality control. The flexibility of **OptiMax** units even allows you to build an extra floor later or move your building, should your space requirements change. Modular solutions have never been so easy.

Flexible Modular Space

OptiMax modular buildings are suitable for different types of spaces. Whether you need an office, classroom, secure government building, dormitory, sports facility, or high-end hospitality building, **IteraSpace** is your reliable partner! Our modular units are incredibly sturdy, sustainable, non-combustible, and flexible to accommodate any wishes. From budget-oriented to high-scale building, we engineer the perfect solutions.

30' x 10' MODULAR UNIT

Our Biggest Modular Unit

www.iteraspace.com

Modular Unit 30' x 10'

Stackable Building

Individual Unit - 30' x 10'

Size

Introducing our largest modular unit yet, measuring an impressive 10 feet by 30 feet! Designed with versatility and spaciousness in mind, this unit offers ample room for various applications, whether it's for commercial, residential, or industrial purposes.

Flexibility

With a footprint of 300 square feet, this modular unit stands out as our flagship model, providing unmatched flexibility to accommodate diverse needs. Whether you envision it as a sizable office space, a multi-room residential unit, or a dynamic retail environment, the possibilities are virtually endless.

Quality

Constructed with high-quality materials and precision engineering, this unit ensures durability, reliability and longevity. Its modular design allows for seamless integration with existing structures or standalone deployment, making it an ideal solution for both temporary and permanent installations.

Technical Specifications

- 160 mph wind speed design load 3 story stacking or higher
- Type II-B non-combustible buildings
- Flexible module size: 8'x16', 8'x20', 8'x24', 8'x30, 10'x30'
- Steel moment frame with panelized walls
- Easy to deploy
- Easy to relocate
- Multiple color options

Modular Unit Data

- Electrical: NEC compliant
- Interior Height: 8'2" standard (up to 10')
- Roof Insulation: R30
- Floor Insulation: R21
- Wall Insulation: R15
- Floor Finish: Vinyl floor
- Ceiling Finish: Pure white, coil coated, smooth surface
- Wall Finish: Pure white, coil coated, smooth surface
- Lights: LED lighting / panels
- Sustainability: Great efficiency, fully recyclable materials
